Index

action, (D. Otajanov, M.M. Musakhanov), 255, 336
ballistic dot, (A. Sadreev), 57
billiard, (U. Salomov), 167
Bogoliubov transformation, (A. Santana), 187
bubbles in the Fermi Sea, (A. Wirzba), 229

Casimir effect, (A. Wirzba), 229
Casimir energy, (I.H. Duru, A. Wirzba), 229, 269
cavities, (I.H. Duru), 269
chaos, (S. Habib), 43
chaotic dynamics, (D. Otajanov, S. Avazbaev), 179, 336
Chern-Simons number, (M.M. Musakhanov), 255
chiral symmetry, (M.M. Musakhanov), 255
coherent states, (J. Bolte), 89
compactification, (A.E. Santana), 187
conditioned evolution, (S. Habib), 43
confining length, (A.E. Santana), 187
continuous measurement, (S. Habib), 43
couloomb plus linear potential, (D. Otajonov), 336
decoherence, (B. Sundaram), 31
density matrix, (S. Habib), 43
Dirac equation, (J. Bolte), 89
disk scattering, (A. Wirzba), 229
domain growth, (S.P. Kim), 277

Fermi sea, (A. Wirzba), 229
fluxon gas, (M. Jumaev), 155

Gross-Neveau model, (A.E. Santana), 187
instanton, (M.M. Musakhanov), 255
isospectral domains, (U. Similansky), 17
isospectral quantum graphs, (U. Similansky), 17

Juttiner distribution, (A.E. Santana), 187

kick-excited self-adaptive dynamical systems, (V. Damgov), 101
Krein's trace formula, (A. Wirzba), 229
level statistics, (U. Salomov), 167
Lie symmetries, (A.E. Santana), 187
Liouville-like equations, (A.E. Santana), 187
Liouville-von Neumann approach, (S.P. Kim), 277
low-momentum quark determinant, (M.M. Musakhanov), 255
Lyapunov exponents, (S. Avazbaev), 179

massless scalar field, (I.H. Duru), 269
Matsubara mechanism, (A.E. Santana), 187
mesoscopic systems, (B. Sundaram), 31

nonequilibrium phase transitions, (S.P. Kim), 277
non-interacting fermionic matter fields, (A. Wirzba), 229
non-overlapping spheres, (A. Wirzba), 229

photoelectric effect, (B. Sundaram), 31
pionic atoms, (B. Irgaziev), 317
primary quantum magnetic flow, (M. Jumaev), 155
pyramidal and conical wedges, (I.H. Duru), 269

QCD vacuum, (M.M. Musakhanov), 255
quantum backaction, (S. Habib), 43
quantum billiards, (U. Salomov), 167
quantum chaology, (B. Sundaram), 31
quantum chaos, (H. Markum), 243
quantum dot, (A. Sadreev), 57
quantum feedback, (S. Habib), 43
quantum graph, (U. Smilansky, G. Tanner), 17, 69
quark, (D. Otajanov, M.M. Musakhanov), 255, 336
quarkonium, (D. Otajanov, Kh. Butanov), 330, 336

regular graphs, (G. Tanner), 69
relativistic rotor, (G. Milibaeva), 173
resonance overlap, (D. Otajanov), 336

scattering length, (B. Irgaziev), 317
self-adaptive dynamical systems, (V. Damgov), 101
self-adaptive stability, (V. Damgov), 101
semiclassics, (J. Bolte), 89
single cavities, (I.H. Duru), 269
space confinement of fields, (A.E. Santana), 187
spin-orbit coupling, (J. Bolte), 89

thermal fields, (A.E. Santana), 187
thermoelectric fields, (V.I. Fedulov), 141
thermofield dynamics, (A.E. Santana, U. Salomov), 167, 187	hree-body, (J. Madronero), 129
topological defect formation, (S.P. Kim), 277

ultra-strong fields, (B. Sundaram), 31

zero-point energy, (A. Wirzba, F.C. Khanna, I.H. Duru), 215, 229, 269
