Fundamentals of Medical Imaging

Second Edition

Paul Suetens

Katholieke Universiteit Leuven

CAMBRIDGE
UNIVERSITY PRESS

Contents

Preface page vii

Acknowledgments ix

1 Introduction to digital image processing 1

Digital images 1

Image quality 2

Basic image operations 4

2 Radiography 14

Introduction 14

X-rays 14

Interaction with matter 16

X-ray detectors 17

Dual-energy imaging 21

Image quality 23

Equipment 24

Clinical use 25

Biologic effects and safety 27

Future expectations 32

3 X-ray computed tomography 33

Introduction 33

X-ray detectors in CT 34

Imaging 35

Cardiac CT 46

Dual-energy CT 48

Image quality 49

Equipment 53

Clinical use 58

Biologic effects and safety 59

Future expectations 63

4 Magnetic resonance imaging 64

Introduction 64

Physics of the transmitted signal 64

Interaction with tissue 68

Signal detection and detector 71

Imaging 72

Image quality 90

Equipment 95

Clinical use 98

Biologic effects and safety 102

Future expectations 104

5 Nuclear medicine imaging 105

Introduction 105

Radionuclides 105

Interaction of γ -photons and particles
with matter 108

Data acquisition 108

Imaging 111

Image quality 116

Equipment 117

Clinical use 122

Biologic effects and safety 124

Future expectations 125

6 Ultrasound imaging 128

Introduction 128

Physics of acoustic waves 128

Generation and detection of
ultrasound 137

Gray scale imaging 138

Doppler imaging 141

Image quality 145

Equipment 149

Clinical use 152

Biologic effects and safety 155

Future expectations 156

7 Medical image analysis 159

Introduction 159

Manual analysis 160

Automated analysis 160

Computational strategies for automated
medical image analysis 163

Pixel classification 166

Contents

Geometric model matching using a transformation matrix	170
Flexible geometric model matching	175
Validation	186
Future expectations	189
8 Visualization for diagnosis and therapy	190
Introduction	190
2D visualization	192
3D rendering	192
Virtual reality	205
User interaction	207
Intraoperative navigation	208
Augmented reality	214
Future expectations	218
<hr/>	
<i>Appendix A: Linear system theory</i>	219
<i>Appendix B: Exercises</i>	232
<i>Bibliography</i>	246
<i>Index</i>	248
