Table of Contents

Preface	1
R. RUMMEL / Geoid and Gravity in Earth Sciences – An Overview	3
J. FLURY and R. RUMMEL / Future Satellite Gravimetry for Geodesy	13
B. L. A. VERMEERSEN / Challenges from Solid Earth Dynamics for Satellite Gravity Field Missions in the Post-GOCE Era	31
J. RIEGGER and A. GÜNTNER / Time Variation in Hydrology and Gravity	41
P. LEGRAND / Future Gravity Missions and Quasi-Steady Ocean Circulation	57
C. W. HUGHES and P. LEGRAND / Future Benefits of Time-Varying Gravity Missions to Ocean Circulation Studies	73
J. FLURY / Ice Mass Balance and Ice Dynamics from Satellite Gravity Missions	83
P. L. WOODWORTH / Benefits to Studies of Global Sea Level Changes from Future Space Gravity Missions	93
R. RUMMEL / Gravity and Topography of Moon and Planets	103
N. SNEEUW, J. FLURY and R. RUMMEL / Science Requirements on Future Missions and Simulated Mission Scenarios	113
E. J. O. SCHRAMA / Impact of Limitations in Geophysical Back- ground Models on Follow-On Gravity Missions	143
