TABLE OF CONTENTS

Preface: metastable systems under pressure – platform for novel fundamental, technological and environmental applications in the 21 st century <i>S. J. Rzoska, A. Drozd-Rzoska and V. Mazur</i>	xi
Part I: Supercooled, glassy system	
The nature of glass: somethings are clear <i>K. L. Ngai, S. Capaccioli, D. Prevosto and M. Paluch</i>	3
The link between the pressure evolution of the glass temperature in colloidal and molecular glass formers <i>S. J. Rzoska, A. Drozd-Rzoska and A. R. Imre</i>	31
Evidences of a common scaling under cooling and compression for slow and fast relaxations: relevance of local modes for the glass transition <i>S. Capaccioli, K. Kessairi, D. Prevosto, Md. Shahin Thayyil, M. Lucchesi and P. A. Rolla</i>	39
Reorientational relaxation time at the onset of intermolecular cooperativity <i>C. M. Roland and R. Casalini</i>	53
Neutron diffraction as a tool to explore the free energy landscape in orientationally disordered phases <i>M. Rovira-Esteva, L. C. Pardo, J. Ll. Tamarit and F. J. Bermejo</i>	63
A procedure to quantify the short range order of disordered phase <i>L. C. Pardo, M. Rovira-Esteva, J. L. Tamarit, N. Veglio, F. J. Bermejo and G. J. Cuello</i>	79
Consistency of the Vogel- Fulcher-Tammann (VFT) equations for the temperature-, pressure-, volume- and density- related evolutions of dynamic properties in supercooled and superpressed glass forming liquids systems <i>A. Drozd-Rzoska and S. J. Rzoska</i>	93

Part II: Liquid crystals

Stability and metastability in nematic glasses: a computational study <i>M. Ambrozic, T. J. Sluckin, M. Cvetko and S. Kralj</i>	109
--	-----

Phase ordering in mixtures of liquid crystals and nanoparticles <i>B. Rožič, M. Jagodič, S. Gyergyek, G. Lahajnar, V. Popa-Nita, Z. Jagličić, M. Drofenik, Z. Kutnjak and S. Kralj</i>	125
---	-----

Anomalous decoupling of the dc conductivity and the structural relaxation time in the isotropic phase of a rod-like liquid crystalline compound <i>A. Drozd-Rzoska and S. J. Rzoska</i>	141
---	-----

Part III: Near-critical mixtures

An optical Brillouin study of a re-entrant binary liquid mixture <i>F. J. Bermejo and L. Letamendia</i>	153
--	-----

New proposals for supercritical fluids applications <i>S. J. Rzoska and A. Drozd-Rzoska</i>	167
--	-----

2d and 3d quantum rotors in a crystal field: critical points, metastability, and reentrance <i>Y. A. Freiman, B. Hetényi and S. M. Tretyak</i>	181
--	-----

Part IV: Water and liquid- liquid transitons

Metastable water under pressure <i>K. Stokely, M. G. Mazza, H. E. Stanley and G. Franzese</i>	197
--	-----

Critical lines in binary mixtures of components with multiple critical point <i>S. Artemenko, T. Lozovsky and V. Mazur</i>	217
--	-----

About the shape of the melting line as a possible precursor of a liquid-liquid phase transition <i>A. R. Imre and S. J. Rzoska</i>	233
--	-----

Disorder parameter, asymmetry and quasibinodal of water at negative pressures <i>V. B. Rogankov</i>	237
---	-----

Experimental investigations of superheated and supercooled water <i>V. G. Baidakov</i>	253
Estimation of the explosive boiling limit of metastable liquids <i>A. R. Imre, G. Házi and T. Kraska</i>	271
Lifetime of superheated water in a micrometric synthetic fluid inclusion <i>M. El Mekki, C. Ramboz, L. Perdereau, K. Shmulovich and L. Mercury</i>	279
Explosive properties of superheated aqueous solutions in volcanic and hydrothermal systems <i>R. Thiéry, S. Loock and L. Mercury</i>	293
Vapour nucleation in metastable water and solutions by synthetic fluid inclusion method <i>K. Shmulovic and L. Mercury</i>	311
Method of controlled pulse heating: applications for complex fluids and polymers <i>P. V. Skripov</i>	323
Part V: Other metastable systems	
Collective self-diffusion in simple liquids under pressure <i>N. P. Malomuzh, K. S. Shakun and V. Yu. Bardik</i>	339
Thermal conductivity of metastable states of simple alcohols <i>A. I. Krivchikov, O. A. Korolyuk I. V. Sharapova, O. O. Romantsova, F. J. Bermejo, C. Cabrillo, I. Bustinduy and M. A. González</i>	349
Transformation of the strongly hydrogen bonded system into van der Waals one reflected in molecular dynamics <i>K. Kamiński, E. Kamińska, K. Grzybowska, P. Włodarczyk, S. Pawlus, M. Paluch, J. Ziolo, S. J. Rzoska, J. Pilch, A. Kasprzycka and W. Szeja</i>	359
Effects of pressure on stability of biomolecules in solutions studied by neutron scattering <i>M.-C. Bellissent-Funel, M.-S. Appavou and G. Gibrat</i>	377
Generalized Gibbs' thermodynamics and nucleation - growth phenomena <i>J. W. P. Schmelzer</i>	389

Self-assembling of the metastable globular defects in superheated fluorite-like crystals <i>L. N. Yakub and E. S. Yakub</i>	403
Study of metastable states of the precipitates in reactor steels under neutron irradiation <i>A. Gokhman and F. Bergner</i>	411
Dynamics of systems for monitoring of environment <i>W. Nawrocki</i>	419
