Contents

1	High-Resolution Optical and Confocal Microscopy	1
	Olaf Hollricher and Wolfram Ibach	
1.1	Introduction	1
1.2	Introduction to Theoretical Considerations in High-Resolution Microscopy	3
1.3	Introduction to Confocal Microscopy	3
1.4	Electromagnetic Scattering in Optical Systems	4
1.5	3D-Intensity Distribution in the Focus	5
1.5.1	Large Aperture Angles	6
1.5.2	Transition to Small Aperture Angles	9
1.6	Theory of Image Formation	11
1.6.1	Microscope	11
1.6.2	Confocal Microscope	12
1.6.3	Confocal Raman Microscope	12
1.7	Image Formation for Light Scattering	13
1.7.1	Scattering Point	13
1.7.2	Reflection at a Mirror	15
1.8	Image Formation for Raman Scattering	16
1.8.1	Raman Emitting Point	16
1.8.2	Raman Emission of a Layer	17
1.9	Pinhole Size	18
	References	20
2	Introduction to the Fundamentals of Raman Spectroscopy	21
	Benjamin Dietzek, Dana Cialla, Michael Schmitt, and Jürgen Popp	
2.1	Introduction	21
2.2	Classical Picture of Light Scattering	22
2.2.1	Frequency Dependence of Raman Scattering	22
2.2.2	Classical “Selection Rule” and Comparison to IR Absorption	24
2.2.3	Scattered Raman Intensity	25
2.2.4	Shortfalls of the Classical Picture	27

2.3	Raman Cross-Section Enhancement Mechanisms	27
2.3.1	Resonant Raman Scattering	28
2.3.2	Advantages and Applications of Resonance Raman Scattering	31
2.3.3	Surface-Enhanced Raman Scattering	34
	References	40
3	Raman Instrumentation for Confocal Raman Microscopy	43
	Olaf Hollricher	
3.1	Introduction	43
3.2	The Development of Raman Microscopes	44
3.3	Confocality	45
3.4	Throughput of a Confocal Raman Microscope	46
3.4.1	Laser Wavelength	47
3.4.2	Excitation Power	47
3.4.3	Objective	48
3.4.4	Microscope Throughput	48
3.4.5	Coupling Between Microscope and Spectrometer	49
3.4.6	Spectrometer Throughput	49
3.4.7	Gratings	50
3.4.8	CCD Detector	51
3.5	Conclusion	60
	References	60
4	Software Requirements and Data Analysis in Confocal Raman Microscopy	61
	Thomas Dieing and Wolfram Ibach	
4.1	Introduction	61
4.2	Requirements for Data Acquisition Software	62
4.2.1	Data Acquisition	62
4.2.2	Correlation of Spatial and Spectral Data	63
4.3	Description of the Data Sets Acquired in Confocal Raman Microscopy	65
4.4	Pre-processing of Raman Spectra	66
4.4.1	Cosmic Ray Removal	66
4.4.2	Smoothing	68
4.4.3	Background Subtraction and Subtraction of Reference Spectra	70
4.5	Image Generation	72
4.5.1	Univariate Image Generation	72
4.5.2	Multivariate Image Generation	75
4.6	Image Masks and Selective Average Calculation	81
4.7	Combination of Single Spectra with Multi-spectral Data Sets	82
4.7.1	Basis Spectra	83
4.7.2	Fitting Procedure	83

4.8	Combination of Various Images	84
4.9	The Law of Numbers	85
4.10	Materials and Methods	88
	References	89
5	Nano-spectroscopy of Individual Carbon Nanotubes and Isolated Graphene Sheets	91
	Alain Jungen	
5.1	Introduction	91
5.2	Individual Carbon Nanotubes	92
5.2.1	Phonons	92
5.2.2	Theory	95
5.2.3	Experiment	96
5.2.4	Microscopy	98
5.2.5	Thermography	100
5.3	Isolated Graphene Sheets	101
5.3.1	Theory	101
5.3.2	Experiment	102
5.3.3	Charge Distributions	105
5.4	Conclusion	107
	References	108
6	Raman Spectroscopy and Confocal Raman Imaging in Mineralogy and Petrography	111
	Marc Fries and Andrew Steele	
6.1	Introduction	111
6.2	Raman Spectroscopy and Imaging as a Mineralogy/Petrography Tool	112
6.2.1	Working with Thin Sections	114
6.2.2	Control of Laser Power	116
6.3	“Raman Mineralogy” Using Imaging Raman Techniques	119
6.3.1	Mineral Phase Imaging	120
6.3.2	Crystallographic Orientation Imaging	122
6.3.3	Phase Composition Imaging	123
6.4	Examples of “Raman Petrography” Applications	124
6.4.1	Raman Analysis of Shocked Minerals	124
6.4.2	Contextual Imaging of Carbonaceous Materials	126
6.4.3	Fluid Inclusions	129
6.4.4	Ancient Terrestrial Carbonaceous Materials	130
6.5	Raman Mineralogy in Field Geology Studies	130
6.5.1	Extraterrestrial Exploration	132
6.6	Conclusion	133
