Spin Dynamics in Confined Magnetic Structures III

With 164 Figures, 42 in Color

Contents

Precessional Switching of Thin Nanomagnets with Uniaxial Anisotropy

Thibaut Devolder, Hans Werner Schumacher, Claude Chappert	1
1 Introduction	1
2 Basic Facts About Precessional Dynamics in Transverse Field	3
2.1 From Stoner–Wohlfarth Energy Minimization to Precessional Switching	3
2.2 Definitions: Geometry and Notations	6
2.3 A Tutorial Example: The Bascule Precession of a Isotropic Thin Film	7
2.3.1 Magnetization Trajectory for a Loss-Free Isotropic Film Subjected to a Transverse Field	7
2.3.2 Switching Speed for a Loss-Free Isotropic Film Subjected to a Transverse Field	9
3 Precessional Switching at High Hard-Axis Fields	12
3.1 “All-Electrical” Experimental Methods	12
3.2 Evidence of the Quasiperiodic Nature of the Magnetization Motion	13
3.3 Evidence of Quasiballistic Magnetization Switching Trajectories	16
4 Precessional Switching at Moderate Hard-Axis Fields and Zero Damping	19
4.1 Classification of the Magnetization Trajectories	20
4.1.1 Field-Dominated (Switching) Trajectories	20
4.1.2 Anisotropy-Dominated (Nonswitching) Trajectories	22
4.2 Characteristic Times Involved in a Precessional Switching Event Near and Below H_k	22
4.2.1 Initial Delay, Slow-Down Time and Maximum Speed Time	23
4.2.2 Rule of Thumb for the Precession Frequency	24
4.3 Minimal Switching Field, Bifurcation Trajectory and its Intrinsic Noise Sensitivity	26
4.4 Arbitrary Initial Magnetization and Consequences for Nonmacrospin Samples	27
4.5 Minimal Reversal Field Versus Minimal Energy Cost	29
4.6 Perspectives for the Speed Scaling of Precessional MRAM . . .	30

5	Damped Nanomagnets: Relaxation-Dominated Precessional Switching	30
5.1	Consequences of Finite Damping	31
5.1.1	Loss of Energy and of Periodicity	31
5.1.2	Rise-Time Constraints	31
5.2	Perturbation Treatment of Finite Damping	32
5.2.1	Energy Loss Per Unit Cycling of the Trajectory	32
5.2.2	Number of Trajectories Gone Through Before Bifurcation	33
5.3	Bifurcation Field in the Presence of Finite Damping	34
