Contents

1	Disks Around Young Binary Stars	1
	Lisa Prato and Alycia J. Weinberger	
2	Probing the Impact of Stellar Duplicity on Planet Occurrence with Spectroscopic and Imaging Observations	19
	Anne Eggenberger and Stéphane Udry	
3	The Detection of Extrasolar Planets Using Precise Stellar Radial Velocities	51
	Artie P. Hatzes, William D. Cochran, and Michael Endl	
4	Observational Techniques for Detecting Planets in Binary Systems	77
	Matthew W. Mutterspaugh, Maciej Konacki, Benjamin F. Lane, and Eric Pfahl	
5	The SARG Planet Search	105
	S. Desidera, R. Gratton, M. Endl, A.F. Martinez Fiorenzano, M. Barbieri, R. Claudi, R. Cosentino, S. Scuderi, and M. Bonavita	
6	Early Evolution of Planets in Binaries: Planet–Disk Interaction	135
	Willy Kley and Richard P. Nelson	
7	Dynamics and Planet Formation in/Around Binaries	165
	Francesco Marzari, Philippe Thébault, Steve Kortenamp, and Hans Scholl	
8	Gravitational Instability in Binary Protoplanetary Disks	195
	Lucio Mayer, Alan Boss, and Andrew F. Nelson	

9 N-Body Integrators for Planets in Binary Star Systems239
John E. Chambers

10 Terrestrial Planet Formation in Binary Star Systems265
Elisa V. Quintana and Jack J. Lissauer

**11 Planetary Dynamics and Habitable Planet Formation
in Binary Star Systems285**
Nader Haghighipour, Rudolf Dvorak, and Elke Pilat-Lohinger
