# CONTENTS AT A GLANCE

1. Introduction 1
2. Iterative & Evolutionary 9
3. Agile 25
4. Story 41
5. Motivation 49
6. Evidence 63
7. Scrum 109
8. Extreme Programming 137
9. Unified Process 173
10. Evo 211
11. Practice Tips 247
12. Frequently Asked Questions 297
13. Bibliography 329
# Table of Contents

1 **Introduction** 1  
   Software Is New Product Development 3  
   What's Next?  5  
   Web Resources  6  

2 **Iterative & Evolutionary** 9  
   Iterative Development 9  
   Risk-Driven and Client-Driven Iterative Planning 12  
   Timeboxed Iterative Development 13  
   During the Iteration, No Changes from External Stakeholders 14  
   Evolutionary and Adaptive Development 15  
   Evolutionary Requirements Analysis 15  
   Early "Top Ten" High-Level Requirements and Skillful Analysis 17  
   Evolutionary and Adaptive Planning 17  
   Incremental Delivery 20  
   Evolutionary Delivery 20  
   The Most Common Mistake? 21  
   Specific Iterative & Evolutionary Methods 22  
   What's Next? 23  
   Recommended Readings 23  

3 **Agile** 25  
   Agile Development 25  
   Classification of Methods 26  
   The Agile Manifesto and Principles 27  
   Agile Project Management 29  
   Embrace Communication and Feedback 30  
   Programming As If People Mattered 30  
   Simple Practices and Project Tools 31  
   Empirical vs. Defined & Prescriptive Process 32  
   Principle-Based versus Rule-Based 33  
   Sustainable Discipline: The Human Touch 33  
   Team as a Complex Adaptive System 34  
   Agile Hype? 34  
   Specific Agile Methods 35  
   What's Next? 39  
   Recommended Readings 39  

4 **Story** 41  
   What's Next? 47  

5 **Motivation** 49  
   The Facts of Change on Software Projects 50  
   Key Motivations for Iterative Development 51  
   Meeting the Requirements Challenge Iteratively 55  
   Problems with the Waterfall 57  
   What's Next? 62  

6 **Evidence** 63  
   Summary 64  
   Research Evidence 65  
   Early Historical Project Evidence 79  
   Standards-Body Evidence 87  
   Expert and Thought Leader Evidence 93  
   A Business Case for Iterative Development 100  
   The Historical Accident of Waterfall Validity? 102  
   What's Next? 107  
   Recommended Readings 107  

7 **Scrum** 109  
   Method Overview 110  
   Lifecycle 113  
   Workproducts, Roles, and Practices 114  
   Values 126  
   Common Mistakes and Misunderstandings 127  
   Sample Projects 130  
   Process Mixtures 131  
   Adoption Strategies 132  
   Fact versus Fantasy 133  
   Strengths versus “Other” 134  
   History 135  
   What's Next? 136  
   Recommended Readings 136  

8 **Extreme Programming** 137  
   Method Overview 138  
   Lifecycle 142  
   Workproducts, Roles, and Practices 144  
   Values 155  
   Common Mistakes and Misunderstandings 156  
   Sample Projects 161
