<td>CERN/PS 85-1 (AA)</td>
<td>The CERN Antiproton Collector.**</td>
<td>B. Autin</td>
</tr>
<tr>
<td>CERN/PS 85-3 (AA)</td>
<td>The triggering of high current pseudo-spark switches. **</td>
<td>E. Boggasch</td>
</tr>
<tr>
<td>CERN/PS 85-4 (ML)</td>
<td>An ultra-high vacuum system for coolers.***</td>
<td>H. Riege</td>
</tr>
<tr>
<td>CERN/PS 85-5 (LEA)</td>
<td>Techniques of energy changes and energy monitoring of cooled stored beams.***</td>
<td>D. Möhl</td>
</tr>
<tr>
<td>CERN/PS 85-6 (OP)</td>
<td>Statistics of PS Operation.</td>
<td>G. Azzoni</td>
</tr>
<tr>
<td>CERN/PS 85-7 (AA)</td>
<td>La source d'antiprotons du CERN.+</td>
<td>B. Autin</td>
</tr>
<tr>
<td>CERN/PS 85-8 (LEA)</td>
<td>A comparison of stochastic and electron cooling.***</td>
<td>D. Möhl</td>
</tr>
<tr>
<td>CERN/PS 85-10 (DL)</td>
<td>Introduction to CERN's Antiproton Facilities for the 1990's.++</td>
<td>R. Billinge</td>
</tr>
<tr>
<td>CERN/PS 85-11 (LEA)</td>
<td>Development of the LEAR control system and extracted beam surveillance. ++</td>
<td>P. Liénard</td>
</tr>
<tr>
<td>CERN/PS 85-12 (LEA)</td>
<td>Status and future possibilities of the stochastic cooling system for LEAR. ++</td>
<td>T. Pettersson</td>
</tr>
<tr>
<td>CERN/PS 85-13 (EA)</td>
<td>The LEAR experimental areas status report and possible developments. ++</td>
<td>G. Carron, J.C.Perrier</td>
</tr>
<tr>
<td>CERN/PS 85-14 (AA)</td>
<td>Progress on ACOL. ++</td>
<td>L. Thordahl</td>
</tr>
<tr>
<td>CERN/PS 85-15 (AA)</td>
<td>Transverse instabilities due to Beam-trapped ions and charged matter in the CERN Antiproton Accumulator. +++</td>
<td>D. Simon, D. Dumollard</td>
</tr>
<tr>
<td>CERN/PS 85-16 (AA)</td>
<td>Injection into the New CERN Antiproton collector ring. +++</td>
<td>K-G. Rensfelt</td>
</tr>
<tr>
<td>CERN/PS 85-17 (AA)</td>
<td>Antiproton losses at large transverse amplitudes in the CERN Antiproton Accumulator and corrective measures using skew quadrupoles and sextupoles. +++</td>
<td>E. Jones</td>
</tr>

</table>

**CERN/PS/85-48** (DL)

July 1985
CERN/PS/85-18 (AA) Conducting targets for \( \bar{p} \) production of ACOL past experience and prospects. +++

T.W. Eaton
S. Hancock
C.D. Johnson, E. Jones
S. Maury, S. Milner
J.C. Schnüriger
T.R. Sherwood

F. Pederson

G. Benincasa
A. Daneels
P. Heymans, Ch. Serre

CERN/PS/85-21 (CO) Controls for the LEP Preinjector. +++

B. Kuiper for PS Controls Group

F. Perriollat
A. Gagnaire
R. Debordes

CERN/PS/85-23 (CO) MacIntrotte. +++

F. Di Maio,
F. Perriollat

CERN/PS/85-24 (CO) SMACC. +++

R. Cailliau
B. Carpenter,
A. Gagnaire, W. Heinze
F. Perriollat

CERN/PS/85-25 (BT) A large aperture pulsed septum magnet for Antiproton Injection into the CERN AC ring. +++

P. Pearce
T. Sherwood
P. Bruinsma, H. Boer
Rookhuizen, A. Vogel,
NIKHEF, Amsterdam

CERN/PS/85-26 (PSR) A damper for the \( \bar{p} \) injection oscillations in the PS machine. +++

E. Brouzet, R. Cappi
J. Gonzalez, W. Pirkl
E. Schulte, M. Thivent

CERN/PS/85-27 (LI) The distributed computer control system for the CERN Low Energy Antiproton Ring (LEAR). +++

D. Kemp, J. Knott
P. Liénard
T. Pettersson
A. van der Schueren
U. Tallgren

CERN/PS/85-28 (BR) R.F. beam recombination ("funnelling") at the CERN PSB by means of an 8 MHz dipole magnet.

G. Nassibian
K. Schindl

CERN/PS/85-29 (AA) Beam Tests of a 2 cm Diameter Lithium Lens. +++

D. G. Fiander
C.D. Johnson, S. Maury
T.R. Sherwood
G. Dugan, C. Hojvat,
A. Lennox, Fermilab

CERN/PS/85-30 (AA) A 400 kA Pulse Generator with pseudo-spark switches.

E. Boggasch
H. Riege

CERN/PS/85-31 (LEA) Performance of LEAR. +++

The LEAR team
CERN/PS/85-32 (OP) Data requirements and handshake for the CERN Antiproton transfer operations from the AA and PS to client machines. +++
V. Chohan

C. Steinbach
M. van Rooij

CERN/PS/85-34 (OP) Magnetic field computations of fringe fields between a dipole and a quadrupole magnet. +++
L. Rinolfi
(K. Preis, K. Richter
H. Stögner
IGIE, Austria)

CERN/PS/85-35 (BT) A pulse Generator for short-circuited delay Line Magnet Excitation. ')
D. Fliander, A. Fowler
D. Grier, K. Metzmacher
(H. Menown, EEV)

CERN/PS/85-36 (RF) New RF exercises envisaged in the CERN-PS for the Antiprotons Production Beam of the ACOL machine. +++
R. Garoby

CERN/PS/85-37 (LEA) LEAR Present status, future development. ++
P. Lefèvre

CERN/PS/85-38 (LEA) Technical implications of future options for LEAR. ++
D. Moehl

E. Gianfelice,
P. Lefèvre, D. Möhl

CERN/PS/85-40 (LEA) Post-Deceleration of the LEAR beam by a radiofrequency quadrupole.
C. Biscari,
F. Iazzourene

CERN/PS/85-41 (LEA) Charge exchange injection and diagnostics with H- in LEAR. ++
E. Asséo, M. Chanel
D. Möhl, G. Molinari
E. Steffens, M. v. Rooij

CERN/PS/85-42 (LEA) Contribution to the study of closed-orbit correction in particle storage rings with unequally spaced monitors and correctors. Application to "LEAR".
E. Gianfelice,
R. Giannini

CERN/PS/85-44 (AA) Beam Impedance Measurement by the Wire Method using a Synthetic Pulse Technique. +++
F. Caspers

R. Billinge
(P. Seyfert, Grenoble
M. Turowski, Karlsruhe
R. Vascarone, Genova)

CERN/PS/85-47 (ML) Cryogenic Design of the stochastic cooling pick-ups for the CERN Antiproton Collector (ACOL). '"
Ph. Lebrun
S. Milner
A. Poncelet

J. Lekhal-De Winter
