Atomic Information Technology

Safety and Economy of Nuclear
Power Plants

Contents

1	Introduction	1
1.1	Background	1
1.2	Basic Statistics	3
1.3	Fuzzy Set Theory	5
1.4	Artificial Neural Network	5
1.5	System Dynamics	6
	References	8
2	Dynamical Modeling of Economy in Global Nuclear Energy Market	11
2.1	Introduction	11
2.2	Method	12
2.3	Calculation	14
2.4	Results	21
2.5	Conclusions	21
	References	22
3	Assessment of National Nuclear Fuel Cycle for Transmutations of High Level Nuclear Waste	23
3.1	Introduction	23
3.2	Method	26
3.3	Calculation	29
3.4	Results	32
3.5	Conclusions	32
	References	33
4	Dynamical Management of Atomic-Multinology in the Aspect of Energy Policy	35
4.1	Introduction	35
4.2	Method	39

4.3	Calculation	41
4.4	Results	44
4.5	Conclusions	46
	References	47
5	Technological Management of Atomic-Multinology by Social Network Theory	49
5.1	Introduction	49
5.2	Method	53
5.3	Calculation	54
5.4	Results	56
5.5	Conclusions	58
	References	59
6	Nuclear Safety Assessment for the Passive System of the Nuclear Power Plants (NPPs) in Safety Margin Estimation	61
6.1	Introduction	62
6.2	Method	63
6.3	Calculation	64
6.4	Results and Discussions.	66
6.5	Conclusions	69
	References	72
7	Non-linear Dynamical Reliability Analysis in the Very High Temperature Gas Cooled Reactor	75
7.1	Introduction	75
7.2	Dynamics of the Resistance-Stress Method	76
7.3	System Model	77
7.4	Calculation	79
7.5	Results and Discussions.	82
7.6	Conclusions	85
	References	88
8	Dynamical Seismic Probabilistic Safety Assessment for Earthquake.	89
8.1	Introduction	89
8.2	Method	90
8.3	Calculation	93
8.4	Results	94
8.5	Conclusions	95
	References	97

9	Safety Assessment for Lunar Nuclear Power Reactor in Cooling Accident	99
9.1	Introduction	99
9.2	Method	104
9.3	Calculation	106
9.4	Results	109
9.5	Conclusions	111
	References	116
10	Nuclear Safeguard Management of Operation Security in Nuclear Power Plants	119
10.1	Introduction	119
10.2	Factors for Modeling	121
10.2.1	Safeguard Measures Factor	121
10.2.2	Power Upgrades Factor	123
10.2.3	Refueling Factor	125
10.3	Dynamical Method	126
10.3.1	Network Effect	126
10.3.2	Calculation of Modeling	128
10.4	Results	131
10.5	Conclusions	133
	References	134
11	Life Extension Assessment for Safeguard in Nuclear Power Plants (NPPs) Using a Production Function	135
11.1	Introduction	135
11.2	Nuclear Safeguard Estimator Function for Modeling	139
11.3	Dynamical Method	141
11.4	Technology Assessment	142
11.5	Results	142
11.6	Conclusions	143
	References	147
12	Security Investigations in Nuclear Materials Using Analytic Pair Values	149
12.1	Introduction	149
12.2	Method	151
12.3	Results	155
12.4	Conclusions	161
	References	162
13	Nuclear Security Assessment Using Loss Function with Modified Random Numbers	165
13.1	Introduction	165

13.2	Method	167
13.2.1	Game Theory	167
13.2.2	Safeguard Factor	171
13.2.3	Dynamical Method	172
13.3	Results	173
13.4	Conclusions	174
	References	178
14	Conclusion	181
