UNIVERSITY PRESS

Contents

1	Electron crystallography – an introduction	1
2	Fundamental crystallography	17
3	Crystal structure factors and symmetry	42
4	Fundamental transmission electron microscopy	72
5	Electron diffraction (ED)	90
6	Phase contrast, contrast transfer function (CTF) and high-resolution electron microscopy (HRTEM)	131
7	Solving crystal structures from HRTEM images by crystallographic image processing	156
8	Experimental procedures of crystallographic image processing	177
9	Solving crystal structures from ED data	191
10	Structure refinement	213
11	3D electron crystallography	223
12	Simulation of images and electron diffraction patterns	245
13	Applications of electron crystallography	254
	Appendices	268
	Index	321
