Multiscale Computer Modeling in Biomechanics and Biomedical Engineering

Contents

Part I Connective Tissue

Application of Neural Network and Finite Element Method for Multiscale Prediction of Bone Fatigue Crack Growth in Cancellous Bone	3
Ridha Hambli and Nour Hattab	
Multiscale Approach to Understand the Multiphysics Phenomena in Bone Adaptation	31
Thibault Lemaire and Salah Naili	
Multiscale Elastic Models of Collagen Bio-structures: From Cross-Linked Molecules to Soft Tissues	73
Michele Marino and Giuseppe Vairo	
Multiscale Modeling of Ligaments and Tendons	103
Shawn P. Reese, Benjamin J. Ellis and Jeffrey A. Weiss	
Multiscale Modelling of Lymphatic Drainage	149
Tiina Roose and Gavin Tabor	

Part II Muscle, Nerve, Epithelium and Endothelium

A Model of Electromechanical Coupling in the Small Intestine	179
Peng Du, Jeelean Lim and Leo K. Cheng	

Multiscale Computational Modeling in Vascular Biology: From Molecular Mechanisms to Tissue-Level Structure and Function.	209
Heather N. Hayenga, Bryan C. Thorne, Phillip Yen, Jason A. Papin, Shayn M. Peirce and Jay D. Humphrey	
Multiscale Modeling in Vascular Disease and Tissue Engineering	241
Houman Zahedmanesh and Caitríona Lally	
Translational Research: Multi-Scale Models of the Pulmonary Circulation in Health and Disease	259
Alys R. Clark, Kelly S. Burrowes and Merryn H. Tawhai	
 Part III Wounds and Infection	
A Multilevel Finite Element Approach to Study Pressure Ulcer Aetiology	289
Cees W. J. Oomens	
Discrete and Continuum Multiscale Behaviour in Bacterial Communication	299
Sara Jabbari and John R. King	
Wound Healing: Multi-Scale Modeling.	321
Fred J. Vermolen and Amit Gefen	
 Part IV Cancer Research	
Modeling Multiscale Necrotic and Calcified Tissue Biomechanics in Cancer Patients: Application to Ductal Carcinoma In Situ (DCIS).	349
Paul Macklin, Shannon Mumenthaler and John Lowengrub	
Integration of Molecular Signaling into Multiscale Modeling of Cancer.	381
Zhihui Wang and Vittorio Cristini	
Author Index	395
