Continuous and Distributed Systems

Theory and Applications

Contents

Part I Abstract Algebra and Applications

1	Algebra and Geometry Through Hamiltonian Systems.	3
	Anatoly T. Fomenko and Andrei Konyaev	
1.1	Introduction	3
1.2	Atoms and Their Symmetries.	4
1.3	Integer Lattices of Action Variables for “Spherical Pendulum” System	7
1.4	Billiards in Confocal Quadrics	10
1.5	Bertrand’s Manifolds and Their Properties.	14
1.6	Lie Algebras with Generic Coadjoint Orbits of Dimension Two	17
	References	19
2	On Hyperbolic Zeta Function of Lattices.	23
	L. P. Dobrovolskaya, M. N. Dobrovolsky, N. M. Dobrovol’skii and N. N. Dobrovolsky	
2.1	Introduction	23
2.1.1	Lattices	24
2.1.2	Exponential Sums of Lattices.	26
2.1.3	Multidimensional Quadrature Formulas and Hyperbolic Zeta Function of a Grid	29
2.1.4	Hyperbolic Zeta Function of Lattices	34
2.1.5	Generalised Hyperbolic Zeta Function of Lattices . . .	40
2.2	Functional Equation for Hyperbolic Zeta Function of Integer Lattices	45
2.2.1	Periodized in the Parameter b Hurwitz Zeta Function.	46
2.2.2	Dirichlet Series with Periodical Coefficients	47
2.2.3	Functional Equation for Hyperbolic Zeta Function of Integer Lattices	50
2.3	Functional Equation for Hyperbolic Zeta Function of Cartesian Lattices	52

2.4	On Some Unsolved Problems of the Theory of Hyperbolic Zeta Function of Lattices	59
	References	60
3	The Distribution of Values of Arithmetic Functions	63
	G. V. Fedorov	
	References	66
4	On the One Method of Constructing Digital Control System with Minimal Structure.	67
	V. V. Palin	
4.1	The Statement of Problem and Some Familiar Results	67
4.2	Definitions and Some Preliminary Transformations	68
4.3	The Method to Obtain the Characteristic of Completely Controllable	69
4.4	Auxiliary Statements.	69
4.5	The Absence of Associated Vectors Case	70
4.6	The Case of General Position.	71
	Reference	71
5	On Norm Maps and “Universal Norms” of Formal Groups over Integer Rings of Local Fields.	73
	Nikolaj M. Glazunov	
5.1	Introduction	73
5.2	Norm Maps	75
5.3	Results	78
	References	80
6	Assignment of Factors Levels for Design of Experiments with Resource Constraints	81
	S. A. Smirnov, A. A. Glushchenko, E. A. Ilchuk, I. L. Makeenko and N. A. Oriekhova	
6.1	Introduction	81
6.2	Hansel Method.	82
6.3	Modification	83
6.4	Example	85
6.5	Conclusions	86
	References	86

Part II Mechanics and Numerical Methods

7	How to Formulate the Initial-Boundary-Value Problem of Elastodynamics in Terms of Stresses?	89
	D. V. Georgievskii	
7.1	The Classic Formulation of the Dynamic Problem and Its Peculiarities.	89
7.2	Ignaczak–Nowacki’ Formulation	91
7.3	Konovalov’ Formulation	92
7.4	Pobedria’ Formulation.	93
7.5	One More Possible Formulation	93
	References	95
8	Finite-Difference Method of Solution of the Shallow Water Equations on an Unstructured Mesh.	97
	G. M. Kobelkov and A. V. Drutsa	
8.1	Introduction	97
8.2	Formulation of the Problem	97
8.3	Mesh and Mesh Operators	98
8.4	Finite-Dimensional Problem.	100
8.5	Convergence	101
8.6	Results of Numerical Experiments	104
	8.6.1 Estimation of Convergence Order.	104
	8.6.2 Computation of the Real Geographic Domain	105
	References	113
9	Dynamics of Vortices in Near-wall Flows with Irregular Boundaries	115
	I. M. Gorban and O. V. Homenko	
9.1	Introduction	115
9.2	Model of Standing Vortex	117
9.3	Standing Vortex in Cross Groove	119
9.4	Standing Vortex in an Angular Region	121
9.5	Resonant Properties of Standing Vortices and Their Behavior in Perturbed Flow	123
9.6	Summary.	128
	References	128

10 Strongly Convergent Algorithms for Variational Inequality Problem Over the Set of Solutions the Equilibrium Problems . . .	131
Vladimir V. Semenov	
10.1 Introduction	131
10.2 Preliminaries	134
10.3 Convergence Analysis	135
10.4 Concluding Remarks	145
References	145
 Part III Long-time Forecasting in Multidisciplinary Investigations	
11 Multivalued Dynamics of Solutions for Autonomous Operator Differential Equations in Strongest Topologies	149
Mikhail Z. Zgurovsky and Pavlo O. Kasyanov	
11.1 Introduction: Statement of the Problem	149
11.2 Additional Properties of Solutions	151
11.3 Attractors in Strongest Topologies	158
11.4 Application	160
11.5 Conclusions	161
References	161
 12 Structure of Uniform Global Attractor for General Non-Autonomous Reaction-Diffusion System	163
Oleksiy V. Kapustyan, Pavlo O. Kasyanov, José Valero and Mikhail Z. Zgurovsky	
12.1 Introduction	163
12.2 Setting of the Problem	164
12.3 Multivalued Processes and Uniform Attractors	165
12.4 Uniform Global Attractor for RD-System	174
References	180
 13 Topological Properties of Strong Solutions for the 3D Navier-Stokes Equations	181
Pavlo O. Kasyanov, Luisa Toscano and Nina V. Zadoianchuk	
13.1 Introduction	181
13.2 Topological Properties of Strong Solutions	183
13.3 Proof of Theorem 13.2	184
13.4 Proof of Theorem 13.1	185
References	187

14 Inertial Manifolds and Spectral Gap Properties for Wave Equations with Weak and Strong Dissipation	189
Natalia Chalkina	
14.1 Introduction	189
14.2 Statement of the Problem and Spectrum of the Linear Operator	191
14.3 Sufficient Conditions for the Existence of Inertial Manifolds	193
14.4 Proof of Theorem 14.3	197
14.4.1 New Norm in the Spaces $\mathcal{H}_k, k = 1, \dots, k_1$	197
14.4.2 New Norm in the Spaces $\mathcal{H}_k, k = k_1 + 1, \dots, k_2$	198
14.4.3 New Norm in the Space $\mathcal{H}_\infty$	200
14.4.4 End of the Proof of Theorem 14.3	202
References	203
15 On Regularity of All Weak Solutions and Their Attractors for Reaction-Diffusion Inclusion in Unbounded Domain	205
Nataliia V. Gorban and Pavlo O. Kasyanov	
15.1 Introduction	205
15.2 On Compact Global Attractor for Reaction-Diffusion Inclusion in Unbounded Domain	208
15.3 Regularity of All Weak Solutions and Their Attractors	217
References	219
16 On Global Attractors for Autonomous Damped Wave Equation with Discontinuous Nonlinearity	221
Nataliia V. Gorban, Oleksiy V. Kapustyan, Pavlo O. Kasyanov and Liliia S. Paliichuk	
16.1 Introduction	221
16.2 Setting of the Problem	222
16.3 Preliminaries	223
16.4 Properties of Solutions	225
16.5 The Existence of a Global Attractor	231
16.6 Global Attractors for Typically Discontinuous Interaction Functions	232
References	237
Part IV Control Theory and Decision Making	
17 On the Regularities of Mass Random Phenomena	241
Victor I. Ivanenko and Valery A. Labkovsky	
17.1 Introduction	241
17.2 Theorem of Existence of Statistical Regularities	243
17.3 The Proof	246

17.4	Applications in Decision Theory	247
17.5	Concluding Remarks	249
	References	249
18	Optimality Conditions for Partially Observable Markov Decision Processes	251
	Eugene A. Feinberg, Pavlo O. Kasyanov and Mikhail Z. Zgurovsky	
18.1	Introduction	251
18.2	Model Description	252
18.3	Reduction of POMDPs to COMDPs and Optimality Results	256
18.4	Example	262
18.5	Conclusions	263
	References	264
19	On Existence of Optimal Solutions to Boundary Control Problem for an Elastic Body with Quasistatic Evolution of Damage	265
	Peter I. Kogut and Günter Leugering	
19.1	Introduction	265
19.2	Notation and Preliminaries	266
19.3	Radon Measures and Convergence in Variable Spaces	270
19.4	The Model of Quasistatic Evolution of Damage in an Elastic Material	273
19.5	Setting of the Optimal Control Problems and Existence Theorem for Optimal Traction	278
	References	286
20	On Existence and Attainability of Solutions to Optimal Control Problems in Coefficients for Degenerate Variational Inequalities of Monotone Type	287
	Olga P. Kuppenko	
20.1	Introduction	287
20.2	Notation and Preliminaries	289
20.3	Setting of the Optimal Control Problem	294
20.4	Compensated Compactness Lemma in Variable Lebesgue and Sobolev Spaces	295
20.5	Existence of H -Optimal Solutions	296
20.6	Attainability of H -Optimal Solutions	297
	References	300

21 Distributed Optimal Control in One Non-Self-Adjoint Boundary Value Problem	303
V. O. Kapustyan, O. A. Kapustian and O. K. Mazur	
21.1 Introduction	303
21.2 Setting of the Problem	304
21.3 Main Results	305
21.4 Conclusions	311
References	312
22 Guaranteed Safety Operation of Complex Engineering Systems	313
Nataliya D. Pankratova and Andrii M. Raduk	
22.1 Introduction	314
22.2 Information Platform of Engineering Diagnostics of the Complex Object Operation	315
22.3 Diagnostic of Reanimobile's Functioning	321
22.4 Conclusion.	325
References	326
