Wilhelm Kulisch

Deposition of Diamond-Like Superhard Materials

With 60 Figures

Springer

Contents

1. The Material Property Hardness	1
1.1 Definition of Hardness	1
1.2 Hardness Measurements	2
1.3 Hard Materials	5
1.3.1 Ideal Materials	5
1.3.2 Real Materials	8
1.4 Correlations with Other Material Properties	12
1.4.1 Hardness versus Volumetric Lattice Energy	12
1.4.2 Hardness and Bulk Modulus	13
1.4.3 Model of Kisly	15
1.4.4 Model of Cohen	16
2. Diamond-Like Materials	21
2.1 Materials	21
2.2 The B/C/N System	21
2.2.1 Materials in the B/C/N System	22
2.2.2 Carbon and Boron Nitride	23
2.3 Properties of Diamond-Like Materials	27
2.3.1 Thermal and Vibrational Properties	29
2.3.2 Optical and Electronic Properties	32
2.4 State of the Art	35
2.4.1 Diamond	35
2.4.2 Tetrahedral Amorphous Carbon	36
2.4.3 Cubic Boron Nitride	38
2.4.4 β -C ₃ N ₄	40
2.5 Organization of the Remainder of this Book	41
3. Growth Mechanisms	43
3.1 On the Deposition of Thin Films	43
3.2 Growth of Diamond Films	44
3.2.1 Methods for Low-Pressure Diamond Synthesis	44
3.2.2 Gas Phase Processes	47
3.2.3 Transport Processes	59
3.2.4 Surface Processes	63

3.2.5	Macroscopic Diamond Growth	74
3.2.6	Conclusions	77
3.3	Growth of c-BN Films	79
3.3.1	Methods and Parameters	79
3.3.2	Gas Phase and Transport Processes	87
3.3.3	Ion-Induced Mechanisms	88
3.3.4	Modeling of c-BN Growth	89
3.3.5	The Sputter Model	93
3.3.6	Conclusions	101
3.4	Growth of ta-C Films	105
3.4.1	Experimental Observations	106
3.4.2	Growth Mechanisms	108
3.4.3	Conclusions	111
3.5	Growth of CN Films	112
3.5.1	Experimental Observations	112
3.5.2	Discussion	117
3.6	Conclusions	120
4.	Nucleation Mechanisms	125
4.1	On the Theory of Nucleation	125
4.1.1	Macroscopic Thermodynamic Description	125
4.1.2	Statistical Thermodynamic Description	128
4.1.3	Atomistic Description	129
4.1.4	Influence of Surface Defects	131
4.1.5	(Hetero)epitaxy	132
4.1.6	Nucleation of Superhard Materials	133
4.2	Nucleation of Diamond	134
4.2.1	General Considerations	134
4.2.2	Nucleation on Untreated Substrates	136
4.2.3	Nucleation on Highly-Oriented Graphite	138
4.2.4	Abrasive Treatment	140
4.3	Bias-Enhanced Nucleation of Diamond	141
4.3.1	General Considerations	141
4.3.2	Experimental Observations	144
4.3.3	Discussion and Modeling	155
4.4	Nucleation of c-BN	159
4.4.1	Experimental Observations	160
4.4.2	Mechanisms of Nucleation	163
4.5	Nucleation of ta-C and β -C ₃ N ₄	167
4.6	Conclusions	168
