INDICO is a **new web application** for organising meetings. This software allows you to **schedule events**, from simple talks to complex conferences with many sessions and contributions. It includes an **advanced user delegation mechanism**. It also allows **paper reviewing, archival** of conference material, **electronic proceedings** and much more.

### Covers the full event organisation cycle

- **Supports different types of events** *(lectures/meetings/conferences)*
- **OO designed and Python powered**
- **EU funded product** *(IST-2001-34306)*
- **Open source development (GPL)**
- **Built-in data sharing mechanism (OAI)**
