The effect of heavy doping on complex formation and diffusitiy of Sb in Si 25.10.88

88 - 146 F.Sauli (idem) Detec.Develop. 25.10.8
Multidrift tubes development

88 - 147 F.Sauli (idem) Detec.Develop. 25.10.8
Development and applications of the imaging chamber

88 - 148 M.Alvarez et al.. (R.Barate) NA14 25.10.8
Charm photoproduction results in NA14

88 - 149 A.Nylandsted et al.. (G.Weyer) ISOLDE 26.10.8
Applications of Mossbauer spectroscopy to investigations of defects in semiconductors

88 - 150 G.Rummel et al.. (G.Weyer) ISOLDE 26.10.8
Diffusion of implanted Te and Se in noble metals

88 - 151 J. Kroll (idem) UA1 26.10.8
Search for heavy quarks at pp colliders

88 - 152 K.Einsweiler at al (idem) UA2 26.10.8
Standard model parameters from UA1 and UA2

88 - 153 R.Breedon et al.. (idem) UA6 31.10.8
Precise comparison of antiproton-proton forward elastic scattering at VS = 24.3 GeV

Production of 300 paraboloidal mirrors with high reflectivity for use in the barrel rich counter in DELPHI at LEP

Production of pseudoscalar mesons in 300 GeV central \( \pi^- \) N collisions

Measurement of \( d\sigma/d\alpha \) and \( A_\pi \) in pp elastic scattering between 497 and 1550 MeV/c

Charged particle multiplicity distributions at 200 and 900 GeV C.M.energy

Spin observables in the reaction \( \bar{p}p \rightarrow \Lambda / \bar{\Lambda} \)

An method for correcting observed distributions of multiplicities using the maximum entropy principle

Experimental limits on the number of light neutrino species from the CERN pp collider

Recent results from Helios (NA34) on proton-Nucleus and Nucleus-Nucleus reactions

Bose-Einstein correlations for pions produced in pp collisions at 360 GeV/c

High transverse momentum \( \eta \) production in \( \pi^- p, \pi^+ p \) and pp interactions at 280 GeV/c

Isospin dependence of the antinucleon-nucleon interaction from antinucleon-nucleon and antinucleon-nucleus data

Experiments with high-energy neutrino beams

Perspectives for a new detector at a future supercollider: the LAA project

UA2 results from the 1987 run

Prospects for observing the top quark with the UA2 detector

High-\( E_T \) Jets in UA1
Searching for the $Z\rightarrow WW\ell\nu+\text{jet}+\text{jet}$ signal at hadron colliders
