Contents

1 Creativity Can Be Cultivated .................................................. 1
  1.1 Creativity Starts with Asking Questions .......................... 2
  1.2 Methodology for Developing Creativity ............................ 3
  1.3 Extend Your Thoughts Guided by the Three-Dimensional
      Navigation ......................................................... 4
  1.4 Creativity Made by a Neural Circuit ............................... 5
  1.5 Foresights of Future ................................................ 8
  1.6 Summary .......................................................... 9
  1.7 Exercise ........................................................ 10

2 Freedom from Time ........................................................ 11
  2.1 Time Axis Traveling .................................................. 12
  2.2 T1: Transpose ...................................................... 13
  2.3 T2: Tempo .......................................................... 17
  2.4 T3: Translation .................................................... 21
  2.5 Designing the Future ............................................. 23
  2.6 The Founding of Nexon .......................................... 24
  2.7 Summary .......................................................... 25
  2.8 Exercise ........................................................ 25

3 Freedom from Space ....................................................... 27
  3.1 Space Travel ........................................................ 27
  3.2 S1: Shape .......................................................... 28
  3.3 S2: Site ............................................................ 34
  3.4 S3: Size ............................................................ 38
  3.5 A Lesson of Cyworld ............................................. 40
  3.6 Globalization of Nexon .......................................... 41
  3.7 Globalized Thinking ............................................. 42
  3.8 Summary .......................................................... 43
  3.9 Exercise ........................................................ 43
4 Freedom from Field ........................................... 46
4.1 Field Travel ........................................... 46
4.2 F1: Function ........................................... 47
4.3 F2: Fertileness ......................................... 49
4.4 F3: Fusion .............................................. 50
4.5 Hyundai Card Benchmarking ......................... 52
4.6 The Discipline of Division Convergence ............. 53
4.7 Misjudgement in History That Resulted from Obsession .... 54
4.8 Welcoming, Tolerating, and Amalgamating Things .... 56
4.9 Summary ............................................. 57
4.10 Exercise .............................................. 57

5 Traveling on a Two-Dimensional Plane ................. 59
5.1 A Plane That Involves Two Axes .................... 59
5.2 Rules in Combination of Time and Space ............ 60
5.3 Rules in Combination of Time and Field .............. 64
5.4 Rules in Combination of Space and Field ............. 66
5.5 Innovation of Steve Jobs ............................... 68
5.6 Science Education That Helps Learners Understand ... 69
5.7 Why They Learn ....................................... 70
5.8 Exercise .............................................. 71

6 Traveling in a Three-Dimensional World ............... 73
6.1 Ideas in the Three-Dimensional World ................ 74
6.2 The Three-Dimensional Future-Oriented Strategies of K-Pop Music .................................. 76
6.3 The Left Hand Law of Creativity ..................... 78
6.4 Circuits of Brain Cells ................................ 79
6.5 Habits are a Product of Neural Circuits ............... 80
6.6 Watching TV Upside Down ............................. 83
6.7 Make Yourself More Creative ......................... 84
6.8 Summary ............................................. 85
6.9 Exercise .............................................. 85

Bibliography .................................................. 87
