REMARKS MADE BY DR. PENNETTA RELATING TO DOCUMENT CERN/FC/15

Para 5: should be amended by substituting for "it is really necessary" the words:

"... and the necessity is recognized by the Director-General."

Para 12: The procedure suggested is not very clear. In any case, the powers given to the Purchasing Officer and to the Divisional Directors are too extensive.

It is also suggested that all information should be conveyed to the delegates of the Member States and not to the commercial intelligence service of the Member Governments.

Finally, it is essential that the draft questionnaire be circulated as soon as possible in order to allow for eventual modifications.
