CMS Preliminary 35.9 fb$^{-1}$ (13 TeV)

- Unfolded Data
- NLO, SM
- POWHEG V2 + PYTHIA8
- NLO, unpolarized
- MG5_aMC@NLO + PYTHIA8 [FxFx]

The graph shows the comparison between data and theory for the distribution of $1/\sigma d\sigma/d\cos\theta^*_2$ versus $\cos\theta^*_2$. The data points are represented by black circles with error bars, and the theoretical predictions are shown as lines. The graph includes a comparison between the statistical (Stat) and combined statistical and systematic (Stat ⊕ Syst) uncertainties.
