CMS Preliminary

35.9 fb⁻¹ (13 TeV)

Preliminary CMS Data
t\bar{t}W and t\bar{t}

Non prompt Diboson Diboson

Systematic uncertainty

Boosted VBF-tagged

![Graph showing the data and backgrounds for the CMS experiment with the CMS Preliminary label and a total luminosity of 35.9 fb⁻¹ (13 TeV). The graph compares data with backgrounds such as t\bar{t}W and t\bar{t}, non prompt Diboson, and W(\nu) + jets. It includes a systematic uncertainty band. The x-axis represents the m_{WW} in GeV, and the y-axis shows the events per 100 GeV bin. The graph shows data points with error bars and background distributions.]
