MEMORANDUM

To:       Members of the SPS Committee
From:     A.N. Diddens and K. Winter
Subject:  WA18

A small team from the National Institute of Nuclear and High Energy Physics at Amsterdam would like to join the CERN-HAMBURG-MOSCOW-ROME Collaboration for the WA18 neutrino experiment, thus preserving the ties that existed originally between some of the Institute members and the proponents of this experiment.

The other members of this Collaboration support this request.

It is the intention to build up a team gradually, consisting of four or five physicists by 1978 and to contribute to the material expenses of the experiment and to improve its future possibilities. The initial members of the Amsterdam team will be A.N. Diddens, J. Dorenbosch and F. Udo.
